Dec 16-10:46

WALT: Identify the different parts of the plant

Look at these pictures of the different parts of a plant.
Take turns to tell your partner what you can remember about the job or jobs each part does. Help each other to remember as much as you can!

Dec 16-10:56

WALT: Identify the different parts of the plant

What Jobs Do They Do?

Roots

Where do we find the roots of a plant?
They grow underneath a plant, below the surface of the soil.

Roots are usually long and are covered in small hairs.

What do you think their jobs are?
The roots anchor the plant in the ground.
They absorb water and nutrients from the soil.

Dec 16-10:58

WALT: Identify the different parts of the plant

What Jobs Do They Do?

Stem or Trunk
What is a stem or trunk?
Branches, leaves and flowers grow from the stem or trunk.
A trunk is woody, and often has a layer of bark around it.
What job does it do?
The stem or trunk holds the plant up.
It also carries water and nutrients from the roots to the leaves.

Dec 16-10:59

WALT: Identify the different parts of the plant

What Jobs Do They Do?

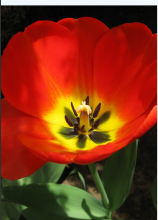

Leaves
What job do leaves do?
The leaves make food for the plant using sunlight and carbon dioxide from the air.

Dec 16-11:30

WALT: Identify the different parts of the plant

What Jobs Do They Do?

Flowers
Do you know what the flower's job is?
Flowers are brightly coloured to attract insects and birds.
The insects carry pollen to other flowers.
Flowers use the pollen to make seeds to grow new plants.
