**WALT: Solve addition and subtraction word problems (Consolidation)**

Show your working out in your Maths books.

- Read the question (again)
- Find out what the question is asking you to do. Are you adding? Subtracting?
- Underline the key information in the word problem. What information has been given to you already?
- Note the language used. eg. Is it asking you to find a total altogether? If so, what does that mean?

- 1) Jack bought some rope from the DIY store that is 348cm long.

He cuts off 20cm. How much does he have remaining?

- 2) Two points are marked on a number line.

What is the difference between the two points?

- 3) Amy bought a jumper for £120. The shoes cost £75 more than the jumper. How much were the shoes?
- 4) Georgina has 450 marbles.  
Fey has 120 fewer than Georgina.  
Fey is trying to collect 500 marbles.  
How many more marbles does Fey need?

**Challenge:**

Dora wants to buy a new computer.

She has saved £287

Each month she saves another £100

How many more months will it take Dora to save enough to buy the computer?
