

WALT: subtract 2 digit numbers crossing the tens using a number line.

1	2	3	4		6	7	8	9	10
11	12		14	15	16	17	18		20
	22	23	24		26	27	28	29	30
31		33	34	35	36		38	39	40
41	42		44	45	46	47	48	49	50
51	52	53	54		56	57	58	59	
61	62	63		65	66	67	68	69	70
71		73	74	75	76	77	78		80
81	82	83		85	86	87	88	89	90
	92	93	94	95	96	97	98		100

What are the missing numbers?

WALT: subtract 2 digit numbers crossing the tens using a number line.

Today we are using number lines to subtract 2 digit numbers where we cross the tens.
What do you think that means?

Hint!
Have a look at the number sentence.

$$22 - 14 =$$

WALT: subtract 2 digit numbers crossing the tens using a number line.

Remember when we subtract 2 digit numbers we need to partition the second number.

Hint!

Have a look at the number sentence.

$$\begin{array}{r} 22 - 14 = \\ \underline{} \\ 10 \end{array}$$

WALT: subtract 2 digit numbers crossing the tens using a number line.

Remember when we subtract 2 digit numbers we need to partition the second number.

Hint!

Have a look at the number sentence.

$$22 - 14 =$$

$$10 \quad 4$$

-4
-10

WALT: subtract 2 digit numbers crossing the tens using a number line.

Remember when we subtract 2 digit numbers we need to partition the second number.

Hint!

Have a look at the number sentence.

$$24 - 16 =$$

WALT: subtract 2 digit numbers crossing the tens using a number line.

Remember when we subtract 2 digit numbers we need to partition the second number.

Hint!

Have a look at the number sentence.

$$21 - 16 =$$

WALT: subtracty 2 digit numbers crossing the tens using a number line.

Remember when we subtract 2 digit numbers we need to partition the second number.

Hint!

Have a look at the number sentence.

$$22 - 18 =$$

WALT: subtract 2 digit numbers crossing the tens using a number line.

Remember when we subtract 2 digit numbers we need to partition the second number.

Hint!

Have a look at the number sentence.

$$23 - 16 =$$

The equation shows the number 16 partitioned into 10 and 6. A diagonal line goes from the 1 down to the 6, and another diagonal line goes from the 6 down to the equals sign.

Is this number sentence correct?

$$20 - 5 = 14$$

Is this number sentence correct?

$$19 - 12 = 14$$

Is this number sentence correct?

$$29 - 12 + 11 = 24$$
