

Summer 1 Year 4 – Data Logging

Computing Concepts

Presentation

Presentation
Expressing ideas

Systems

Systems
Knowing how to create and use programmes

Digital world

Digital World
Knowing how to use a range of technology

Curriculum Objectives

- Use sequence, selection, and repetition in programs; work with variables and various forms of input and output
- Select, use, and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems, and content that accomplish given goals, including collecting, analysing, evaluating, and presenting data and information

Learning Overview

In this unit, learners will consider how and why data is collected over time. Learners will consider the senses that humans use to experience the environment and how computers can use special input devices called sensors to monitor the environment. Learners will collect data as well as access data captured over long periods of time. They will look at data points, data sets, and logging intervals. Learners will spend time using a computer to review and analyse data. Towards the end of the unit, learners will pose questions and then use data loggers to automatically collect the data needed to answer those questions.

Lessons will cover:

- Answering Questions
- Data collection
- Logging
- Analysing data
- Data for answers
- Answering my question
